EAIN 2419-Meeting#4 PPT Presentation Evaluation-Survey Results

32/33 members responded =97%

For the following statements, please indicate to what extent you disagree or agree with "0" indicating "strongly disagree" and "10" indicating "strongly agree". There are no right or wrong answers, it is important that the responses reflect your individual experience and opinions."The information in the PPT#4 presentation was provided in an easy to understand manner"

1. The information in the PPT#4 presentation was provided in an easy to understand manner	Rating Average	Response Count
	8.66	32
	answered question	32

2. Overview of existing resources (PCORnet, eMERGE) was informative and provided in an easy to understand manner	Rating Average	Response Count
	8.91	32
	answered question	32

3. Examples of technologies facilitating research (Prometheus, LLC, Pathfinder, Inc.) were informative and provided in an easy to understand manner	Rating Average	Response Count
	8.59	32
	answered question	32

4. Examples of Electronic Medical Record systems were informative and provided in an easy to understand manner	Rating Average	Response Count
	9.16	32
	answered question	32

5. Would you like to schedule a personal meeting and/or call with the PI for further clarification of materials discussed in the PPT #4 presentation?	Response Percent	Response Count
Yes, I would like to schedule a meeting	0%	0
No, not at this point	100%	32
	answered question	32

Additional Comments

Meeting#4 presentation (PPT#4)

1) There is too much information on the slides, and putting links to videos where there is additional description needed is not efficient. Viewers (like me) are highly unlikely to click a link to watch a 3 minute video when they are already short on time. It would be better if you had slides with less content and recorded a speaker who describes what they want viewers to get out of it. As an example, when I have to do online training for OSHA and other work-related certifications, a slide set with an audio recording, followed by questions that demonstrate the viewer understood the key elements of content, would be more efficient.

2) I thought it was well put together but some of the slides were quite "dense". Perhaps if I had time to view all of the presentations on YouTube, it would help.

3) Some of the technical information was over my head, but presented in a nice fashion!

4) There was a lot of information. Still not entirely sure what these companies do. I didn't watch the associated videos or read the websites but that may help my understanding.

PPT#4-Overview of existing resources (PCORnet, eMERGE)

1) Having the actual findings from eMERGE phase I and II would be helpful – and/or a list of publications that were a result of the effort. Same comment maybe for PCORnet.

2) The extensive explanation of PCORnet was very helpful.

3) I will dig to find out more about PCORnet, as there may be a collaboration opportunity.

4) I had some difficulty opening a few videos, Prometheus and Pathfinder.

5) eMERGE seems like it is a great opportunity. I was not aware of this project previously.

PPT#4-Examples of technologies (Prometheus, LLC and Pathfinder HI)

1) I was unaware of many of these companies previously and this PowerPoint introduced me to them.

PPT#4-Examples of Electronic Medical record systems

1) Can a patient and/or guardian access their own EHR? Do PHR's exist? How does an individual get access to their PHR?

2) The links were really helpful.

PPT#4-Project website

1) The definition and description of PCORnet was extremely helpful in providing a framework for how we researchers could access genetic data and incorporate it in research to improve health outcomes.

2) Materials are very well designed and presented!

3) Maybe there would be a suggestion at the beginning about how much time this PP takes, just so I can best set aside adequate time. I could just add up all of the video times as well. :) I really like the information, thanks!

4) To help update some of the eMERGE projects, I am sending a presentation via email to Dr. Talebizadeh. I recently gave this talk at a symposium on personalized medicine in Beijing. This provides an overview of some interesting projects eMERGE is conducting and gives website addresses linking to some nice tools that are available.

PPT#4-Overall suggestions/comments

1) So far the information has been really helpful! I'm learning so much about PCORI and PCORnet. Very exciting!

2) The PowerPoint presentations continue to be informative and very helpful.

3) The final slide (#29) says "Please respond to the survey at your earliest convenience". I suggest replacing this sentence with an actual due date so participants know the turnaround time.

4) Thank you for all the hardworking behind this.

5) Thanks for the explanations and links, very helpful in understanding the 'big picture' of what this project is trying to do.

6) I have enjoyed participating in the in-person group discussions. I was disappointed I was out of town for the last one.

7) Would be good to have a summary slide with the most important features of these initiatives and how these compare to one and other. The same comment applies to information shared about technologies and health record systems.
